

1. Create a table listing 3 types of printers, 2 types of scanners, and 2 types of webcams, and for each, write one real-life use case (for example: 'Inkjet printer – printing college assignments').

ANS:-

Device Category	Type	Real-Life Use Case
Printer	Inkjet Printer	Printing college assignments and color photos
Printer	Laser Printer	Printing office reports and documents quickly
Printer	Dot Matrix Printer	Printing invoices and receipts in banks or warehouses
Scanner	Flatbed Scanner	Scanning certificates, photographs, and documents
Scanner	Handheld Scanner	Scanning barcodes and books while moving around
Webcam	Built-in Webcam	Attending online classes and video meetings
Webcam	External USB Webcam	Live streaming, online interviews, and video conferencing

2. Draw a labeled diagram showing how a typical home printer connects to a laptop or PC, including the connection interface used (USB, Wi-Fi, or Bluetooth).

ANS:-

3. List three different connection interfaces (such as USB, Wi-Fi, Bluetooth) used by peripherals like printers, scanners, and webcams, and for each, name one advantage and one disadvantage. Hint: Think about speed, convenience, and compatibility.

ANS:-

Connection Interface	Advantage	Disadvantage
USB	Fast data transfer and reliable connection	Requires a cable and limited cable length
Wi-Fi	Wireless connection allows multiple devices to use the same printer	Depends on network quality and may disconnect
Bluetooth	Easy wireless connection for nearby devices	Slower speed and shorter range than Wi-Fi

4. Pick any one device you use at home or college (printer, scanner, or webcam). Write step-by-step instructions for how you would connect it to your computer, including what cable or wireless method you would use and any setup steps required.

ANS:-

Device: Inkjet Printer

1. Place the printer near the computer.
2. Connect the printer to a power source and switch it on.
3. Connect the printer to the computer using a **USB cable**.
4. Wait for the computer to detect the printer automatically.
5. If required, install the printer driver from the manufacturer's website or the installation CD.
6. Open **Settings → Bluetooth & Devices → Printers & Scanners** (Windows).
7. Check that the printer appears in the list of installed devices.
8. Print a test page to confirm that the printer is working correctly.

Result: The printer is successfully connected and ready to print documents and photos.
