

1.

On your Windows laptop or PC, open 'System Information' and take a screenshot showing your OS version, processor, and RAM details.

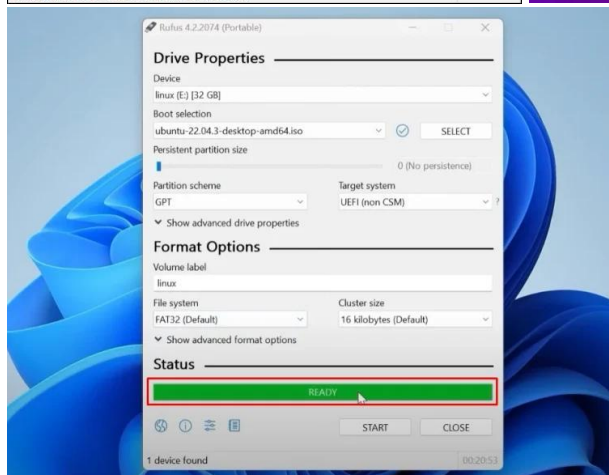

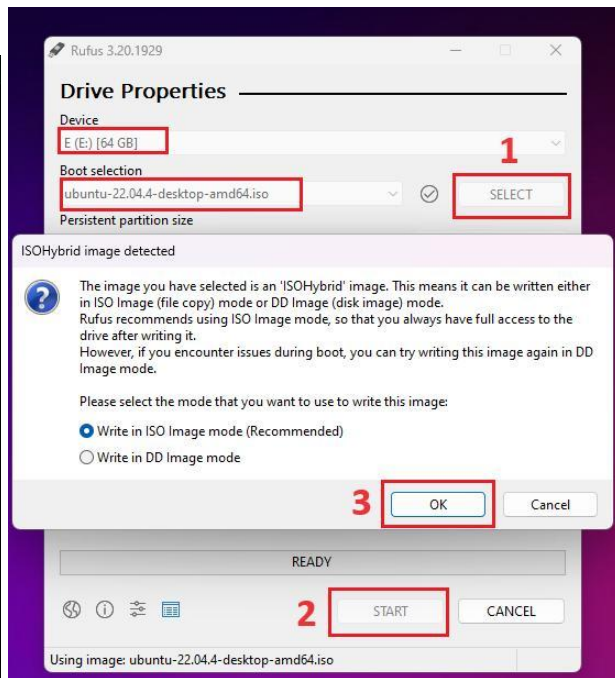

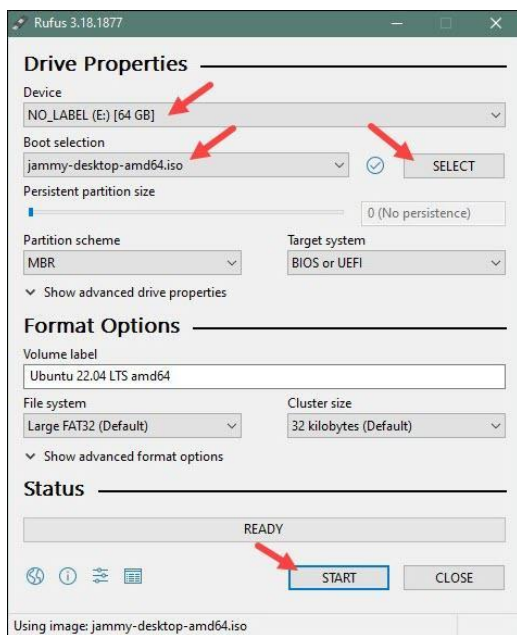

ANS:-

2.

Download any official Linux distribution ISO (like Ubuntu or Fedora), and use Rufus or BalenaEtcher to create a bootable USB drive for installation. Hint: If you don't have a spare USB, use a virtual machine tool like VirtualBox to mount the ISO and start the installation process virtually.

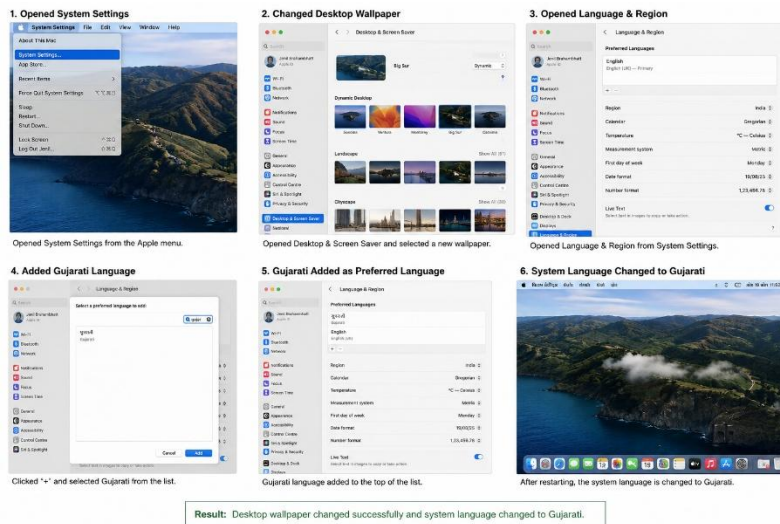

ANS:-

3.

On a macOS device (or using a macOS virtual machine), open 'System Preferences' and change the desktop wallpaper, then adjust the system language to Hindi or Gujarati. Hint: Find 'Language & Region' in System Preferences to add or change languages.

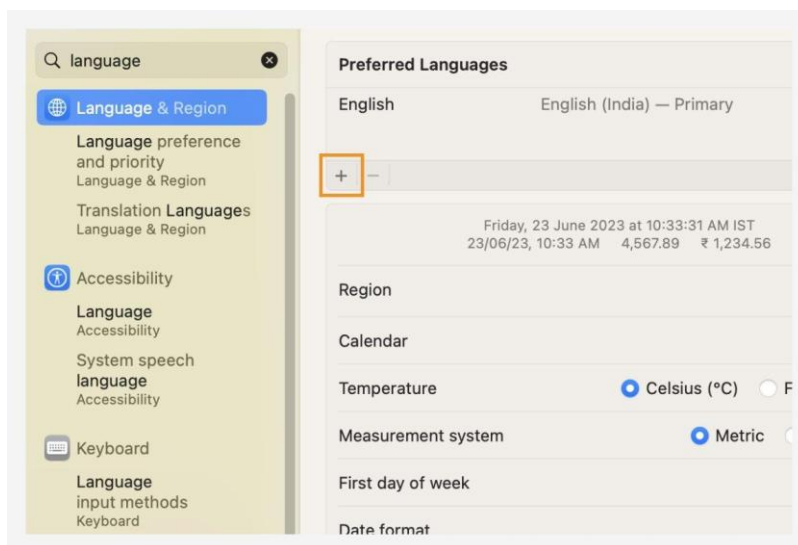

ANS:-

Steps performed:

1. Opened **System Settings** from the Apple menu.
2. Selected **Desktop & Screen Saver** and changed the desktop wallpaper.
3. Opened **Language & Region** under System Settings.
4. Clicked the + button to add a new language.
5. Selected **Gujarati** from the language list.
6. Moved **Gujarati** to the top of the Preferred Languages list.
7. Restarted/logged out of the Mac to apply the language change.

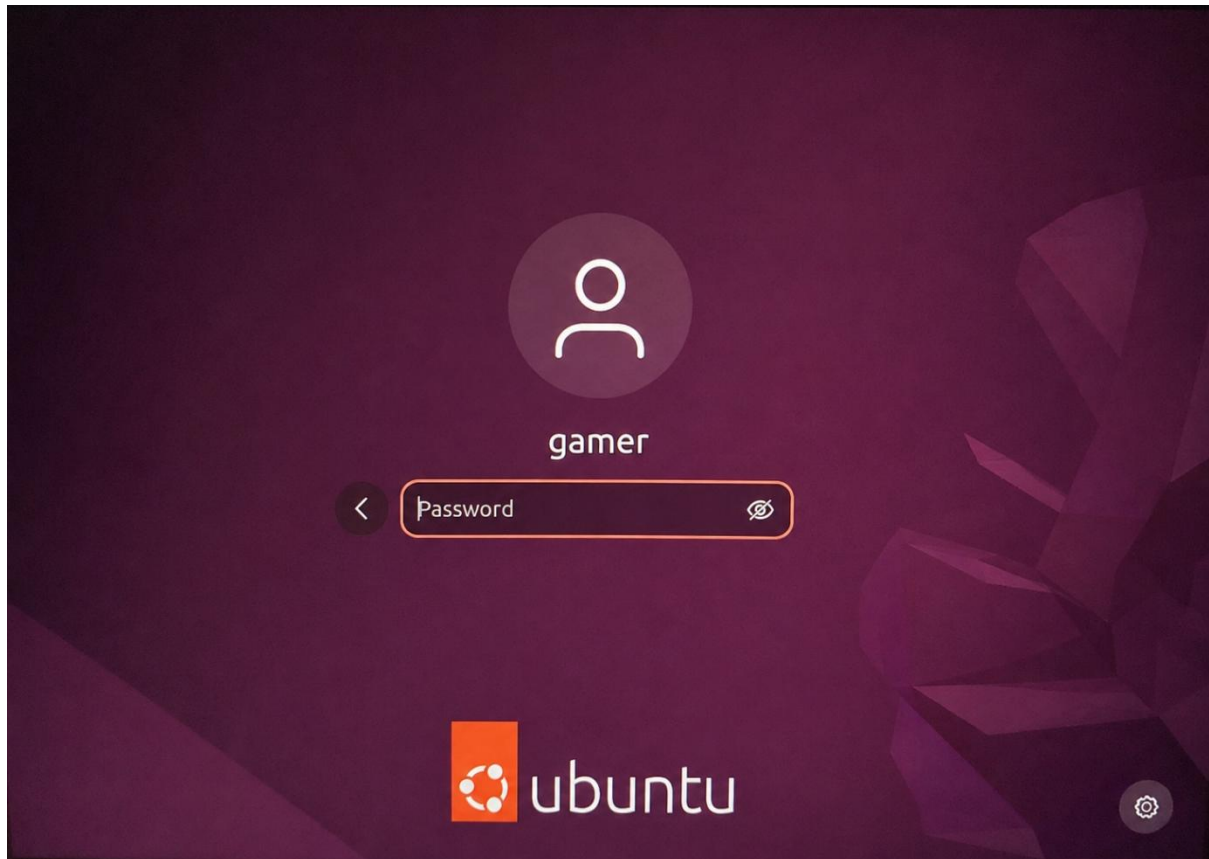

Result: The desktop wallpaper was changed successfully, and the system language was changed to **Gujarati**.

4.

Install a fresh copy of Ubuntu Linux (real or virtual machine) and create a new user account named 'gamer'. After installation, enable automatic login for this user and take a screenshot of the login screen showing the username.

5.

Use ChatGPT to generate a step-by-step guide for installing Windows 10 on a laptop, including partitioning tips and post-installation settings for privacy and updates. Follow the guide and note any steps that were unclear or missing.

ANS:-

Windows 10 Installation Guide

1. Create a bootable Windows 10 USB and back up important files.
2. Restart the laptop and boot from the USB drive.
3. Select the language, keyboard layout, and click **Install Now**.
4. Choose **Custom Installation** and select the required disk partition.
5. Create or format the partition carefully, making sure important data is not deleted.
6. Complete the Windows 10 installation and create a user account.

7. Open **Privacy Settings** and disable unnecessary permissions such as location and microphone access.
8. Open **Windows Update** and install available updates and drivers.
9. Restart the laptop and check that the hardware and internet connection work properly.

Unclear/Missing Steps: The exact Boot Menu key and partition options may vary depending on the laptop model. The guide could also provide more details about backing up data before partitioning.
